

The complete KudiTrack AI platform

Every feature, across every portal, from the market stall to the admin console, illustrated.

● Business App

● Staff & Manager

● Ajo Client Portal

● Cooperative Portal

● Peer Esusu

● Marketer Portal

● Admin Portal

AT A GLANCE

One app for the whole informal economy

KudiTrack AI turns a trader's phone into a business manager, a savings bank for their customers and a payments terminal, and the trader can talk to it in their own language.

7

connected portals

20+

feature modules

5

languages incl. Pidgin, Yoruba, Igbo, Hausa

3

subscription plans: Kobo, Naira, Oga

3

wallet KYC tiers

400+

database migrations shipped

Four pillars

Business books

Sales, expenses, stock, credit, invoices and automatic profit.

Savings management

Digital Ajo/Esusu, rotations, commissions and a client portal.

Money movement

Virtual-account wallet, transfers, bills, airtime and data.

AI in your language

Voice entry, AI assistant, insights and daily voice brief.

Talk your **money**.Track your **profit**.Grow your **business**.

Who it serves

Market traders & shops

Record sales by voice, see today's profit

Ajo / Esusu collectors

Collect without cash risk or disputes

Cooperatives & associations

Members, savings, loans, polls, chat

Staff & branch managers

Scoped access to sales, stock and records

Savers & Ajo clients

See every naira saved, get paid on time

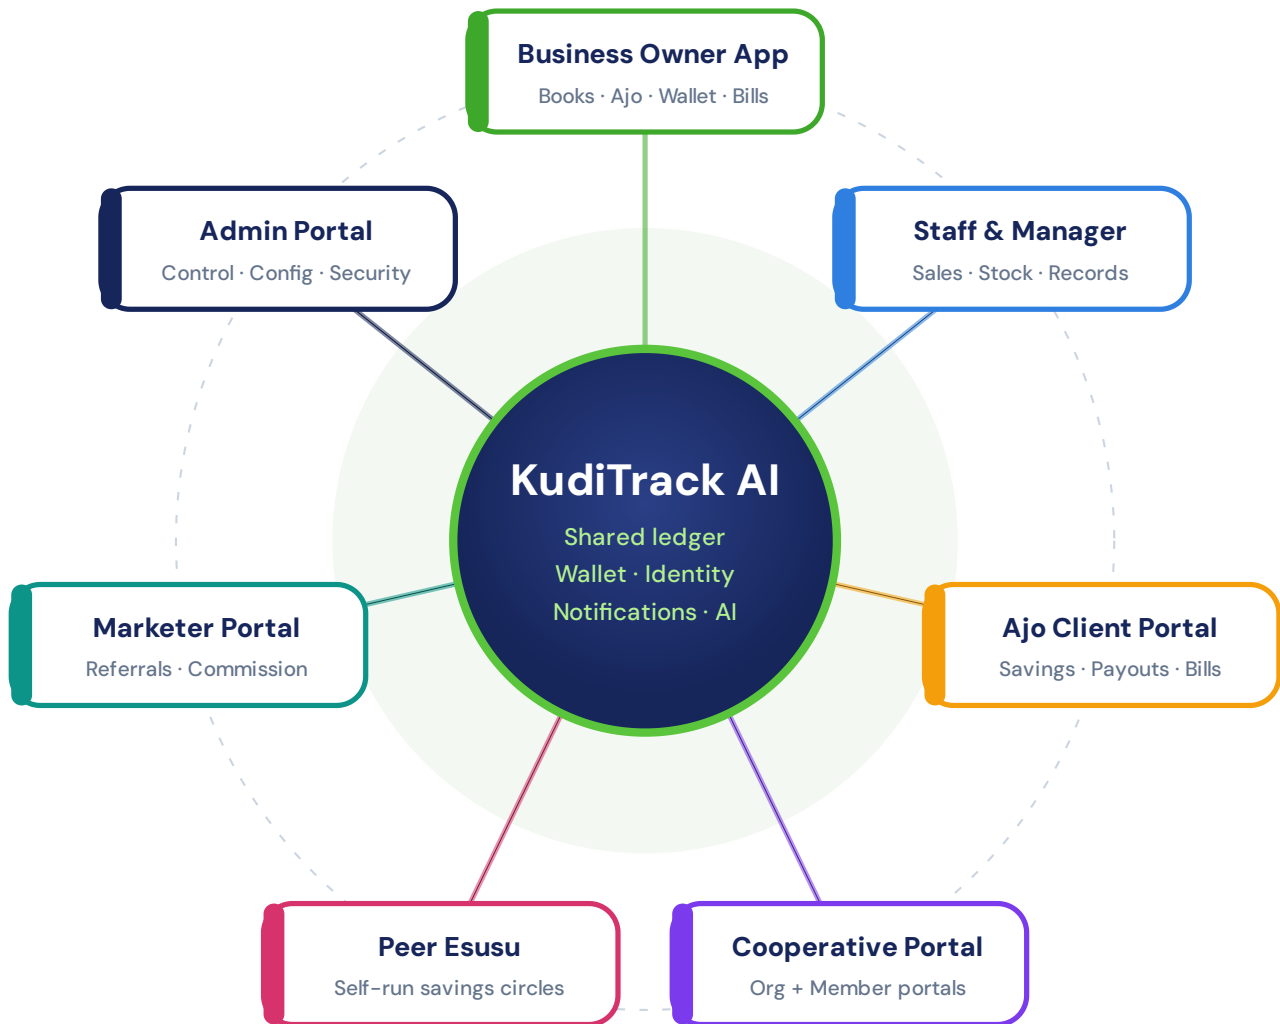

Field marketers

Onboard businesses, earn commission

THE ECOSYSTEM

Seven portals, one platform

Every portal reads and writes to the same secure ledger. A sale recorded by staff, a contribution paid by an Ajo client and a commission earned by a marketer all land in one place, and the admin team sees all of it.

Mobile first

Android app (Capacitor) and web app / PWA, with offline capture and sync.

One identity

Email, phone, BVN/NIN verification and PIN or biometric lock across every portal.

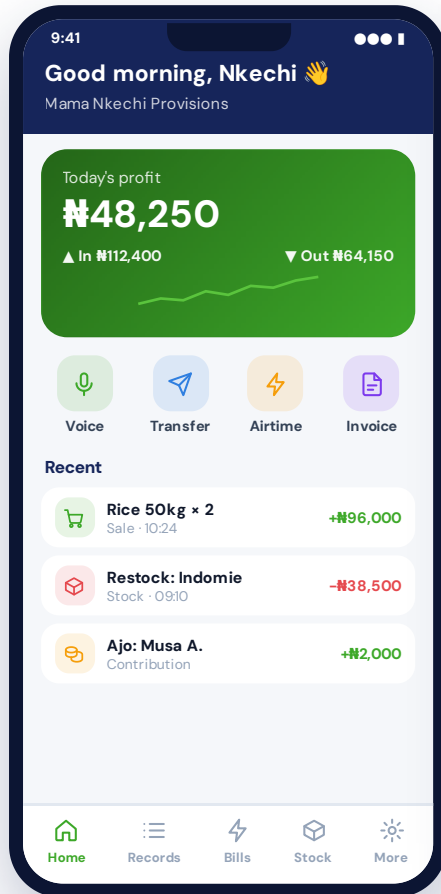

Real-time

Live updates, push notifications, email, SMS and WhatsApp alerts.

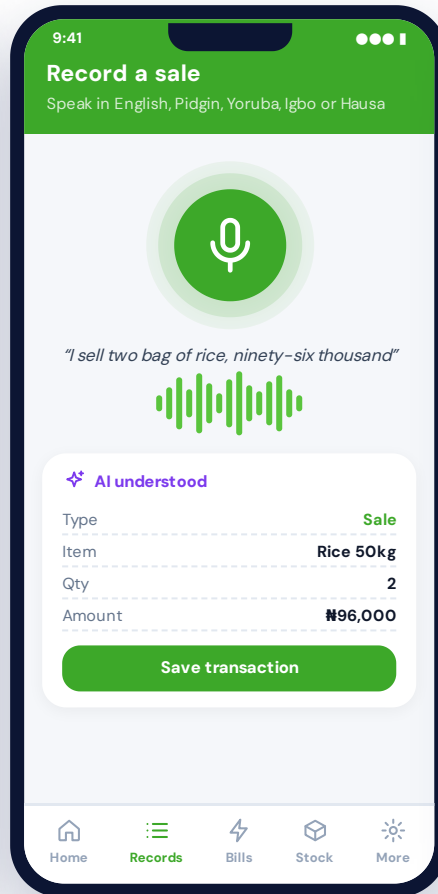

BUSINESS OWNER APP

Run the whole shop from one phone

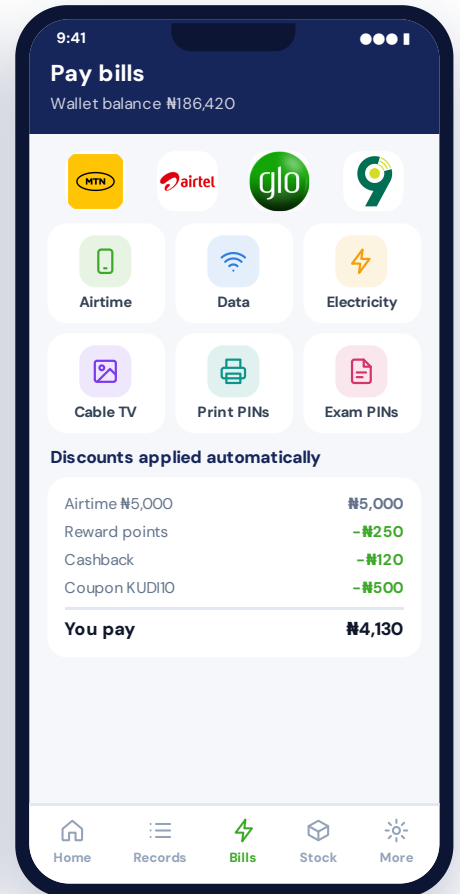

The home dashboard shows today's profit the moment the app opens. Sales can be spoken instead of typed, and bills, airtime and data are paid straight from the wallet with points, cashback and coupons applied automatically.

Home dashboard

Voice transaction entry

Bills & airtime

Live dashboard
Cash in/out, today's collection, profit summary, offers and announcements.

Talk your money
Whisper speech-to-text turns a spoken sentence into a structured transaction.

Bills & VAS
Airtime, data, electricity, TV, exam PINs and saved beneficiaries.

A trader's day with KudiTrack

06:30

Morning

Daily voice brief reads yesterday's profit and today's to-dos.

09:00

Open shop

Sales are spoken, not typed; stock updates itself.

12:00

Midday

Ajo collections and customer repayments land in the wallet.

16:00

Afternoon

Airtime, data and electricity sold or paid from the wallet.

20:00

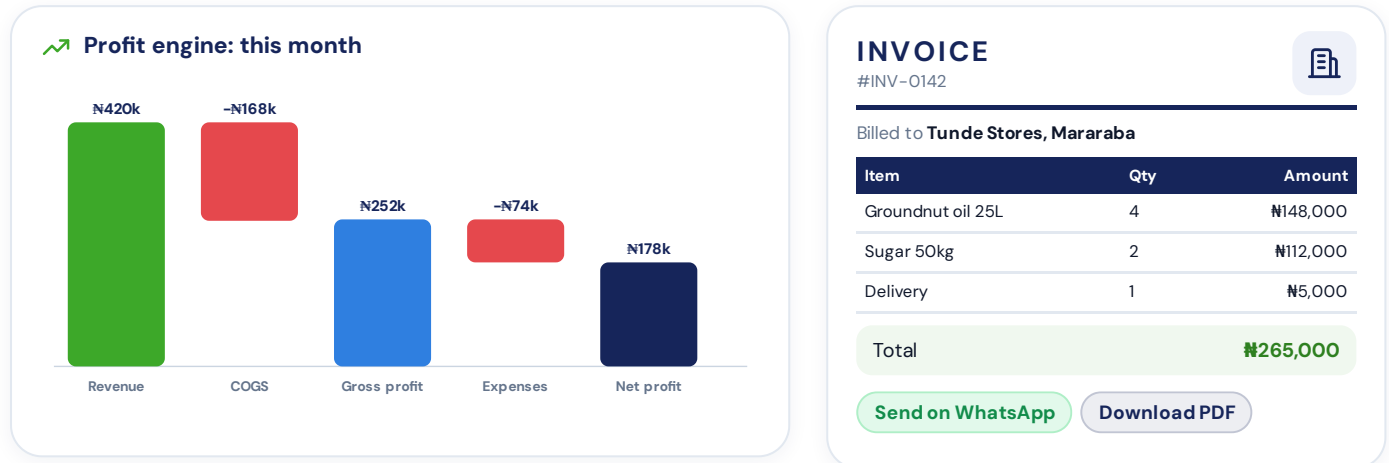

Close

Profit push notification; offline records sync automatically.

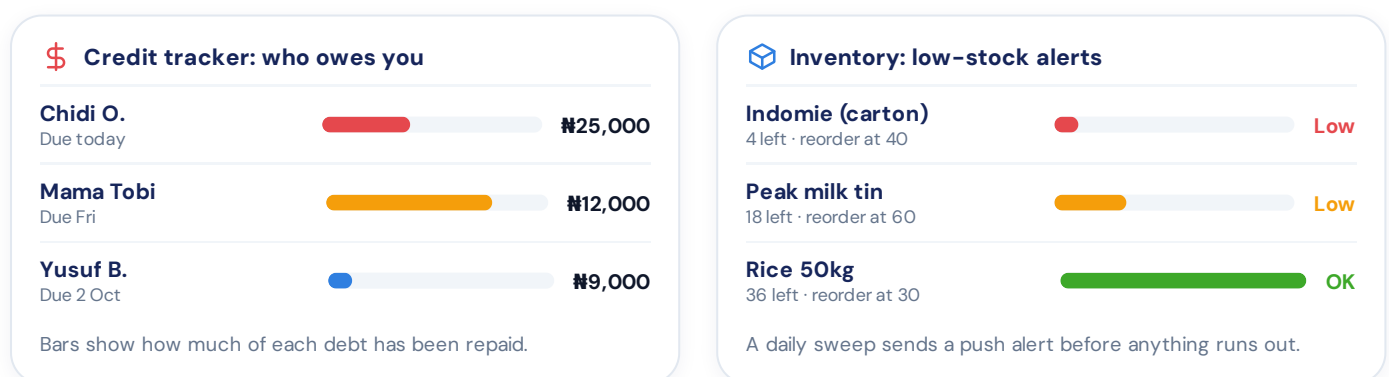

BUSINESS OWNER APP

Books that keep themselves

An auditable profit engine derives every figure from the raw ledger, so revenue, cost of goods, gross profit and net profit are always correct and every number can be traced back to the transactions behind it.

-  **Transactions**
Sales, expenses and stock purchases with line items, receipts as PDF or image, and CSV / PDF export.
-  **Inventory**
Products, cost prices, low-stock daily alerts, and staff-scoped stock views.
-  **Loyalty & rewards**
Points, cashback and coupons (percentage or fixed) with anti-abuse rules.
-  **Business loans**
Loan applications on the Oga plan, routed to partner lenders.
-  **Credit tracker**
Who owes you, flat or percentage interest, repayments, due-today reminders and statements.
-  **Invoices**
Branded invoices with logo, bank details, sub-items and extra charges, sent by PDF or WhatsApp.
-  **Branches**
Multiple locations with their own staff, stock and sales, rolled up for the owner.
-  **Verifiable receipts**
Every receipt carries a reference that anyone can check on the public verification page.

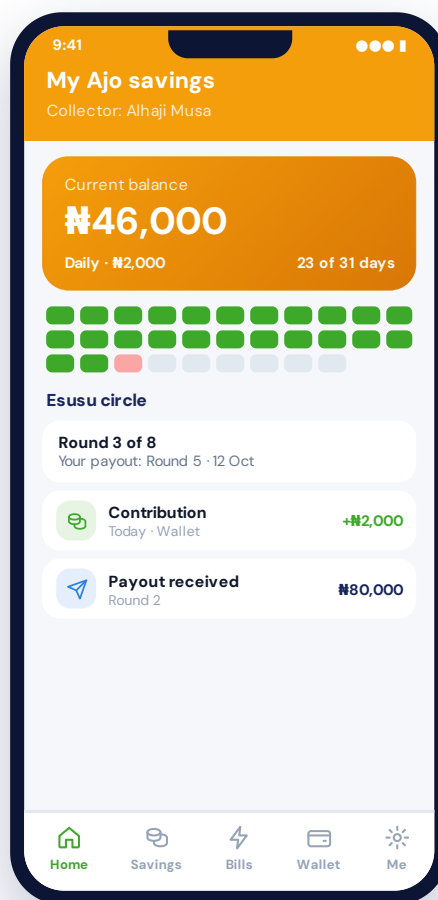

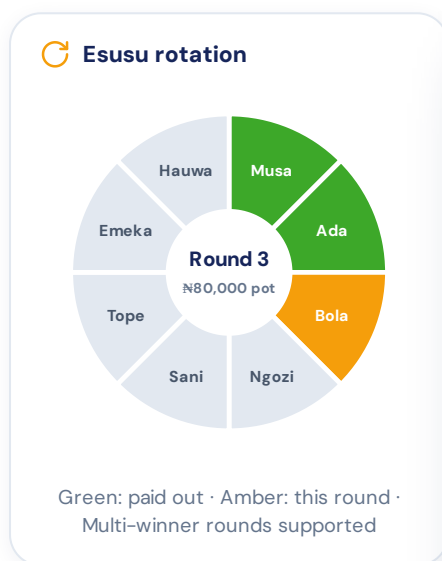

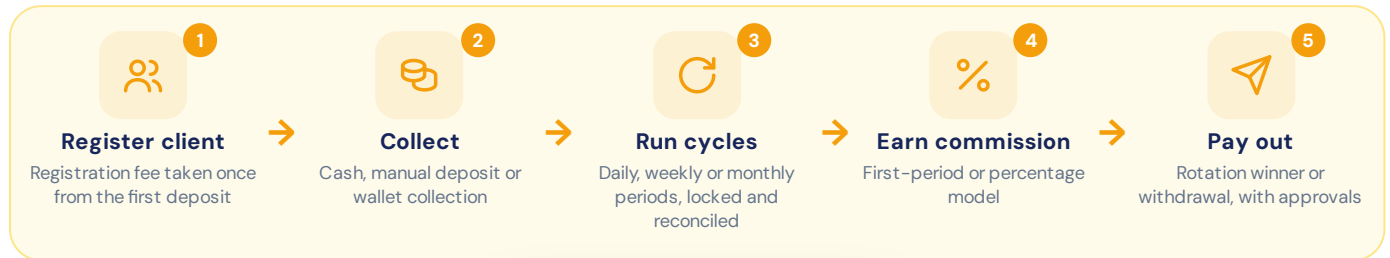

-  **PDF reports**
Profit, sales and statements
-  **CSV export**
Open in Excel or Sheets
-  **Receipts**
PDF or image, share anywhere
-  **WhatsApp**
Send invoices in one tap

AJO & ESUSU

Run your Ajo like a bank

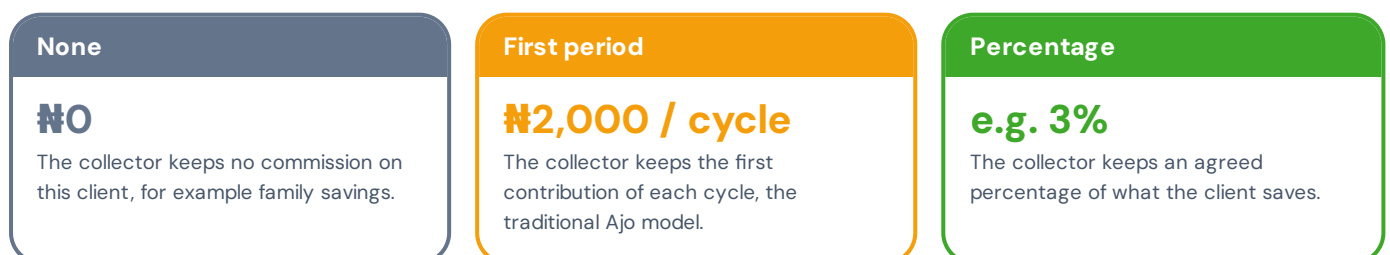

Collectors manage personal savings and group rotations digitally. Commission, registration fees, withdrawals and payouts are calculated and reconciled by the server, and every client sees their own record in the Ajo Client Portal.

Ajo Client Portal

- Approvals**
Withdrawals, archives and reactivations need approval.
- Solvency guards**
Payouts can never exceed what was collected.
- Overdue tracking**
Reminders by push, email and SMS.
- Client portal**
OTP login, PIN, history, disputes, goals.
- Wallet collection**
Clients pay from their own wallet.

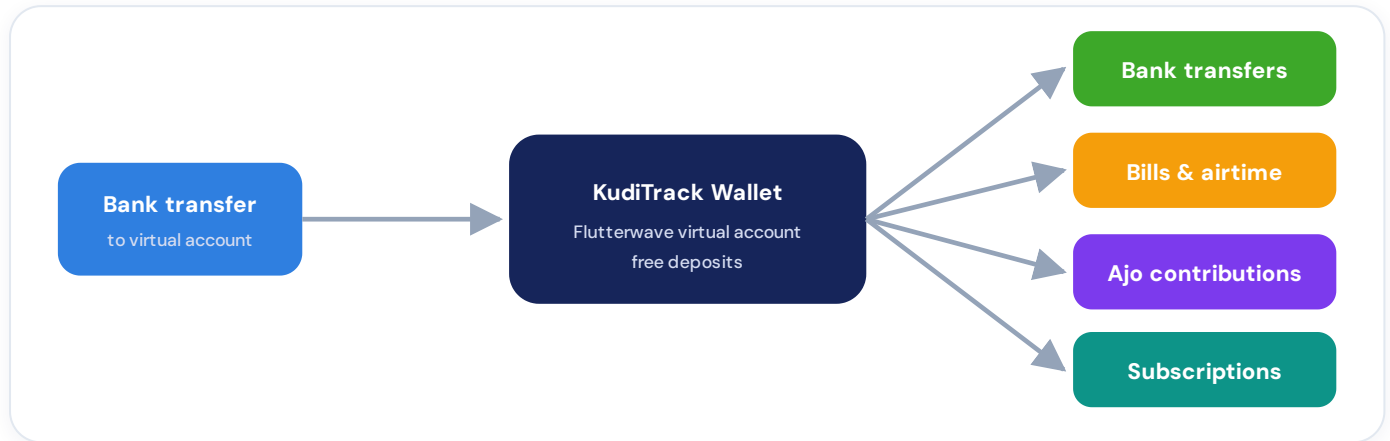

Commission models, calculated for the collector

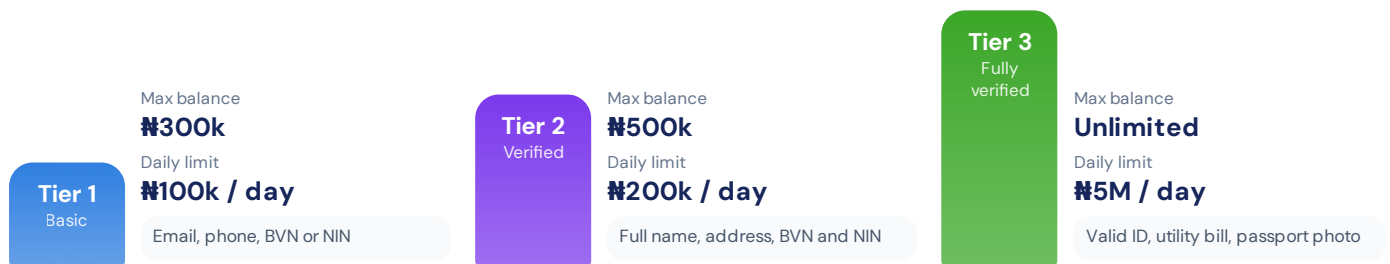

WALLET & PAYMENTS

A verified wallet for every user

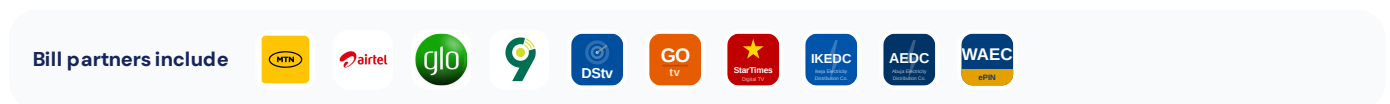

Business owners, staff and Ajo clients each get a dedicated virtual account. Limits grow as users verify more of their identity, and every movement of money is performed and checked on the server.

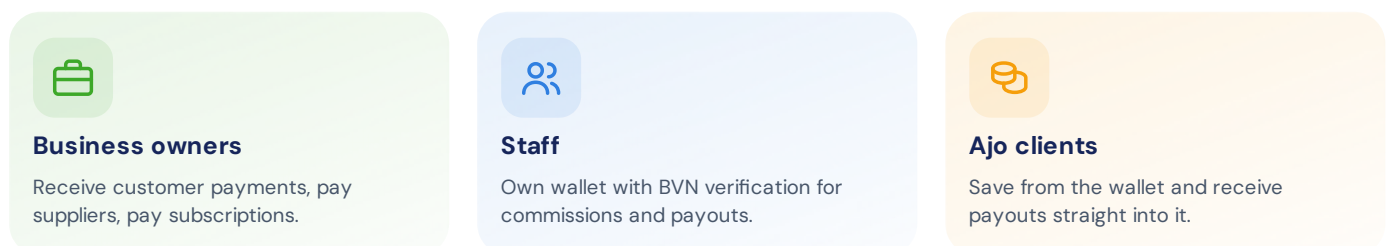

KYC tiers

Simple, transparent fees

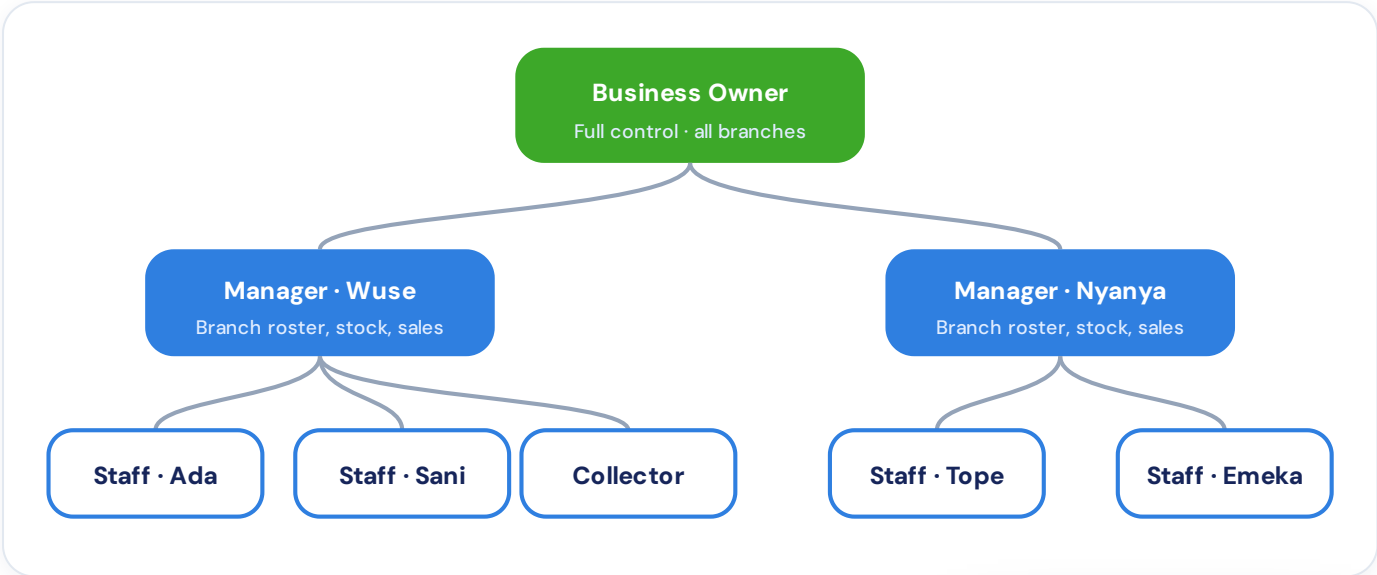

Everyone gets a wallet

STAFF & MANAGER PORTALS

The right access for every role

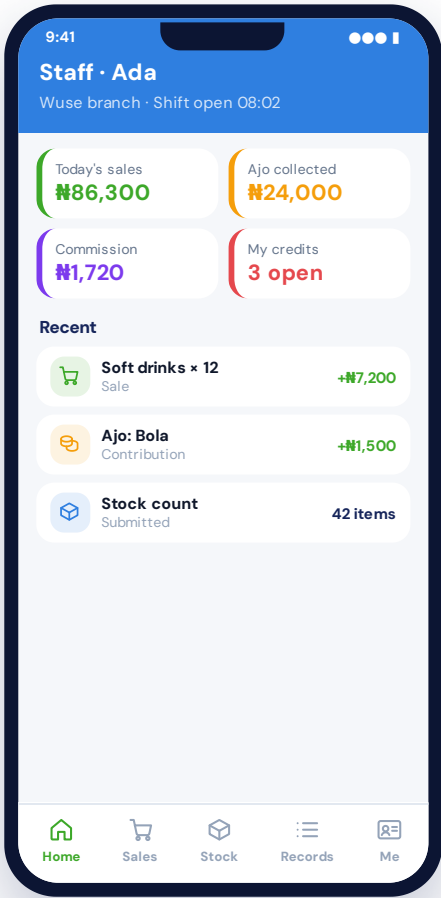

Owners invite staff and managers with a one-time code. Each person gets their own login, wallet and dashboard, and row-level security guarantees they only see their own branch and records.

Permission	Owner	Manager	Staff
Record sales	✓	✓	✓
Manage stock	✓	✓	🔒
Collect Ajo	✓	✓	✓
Approve withdrawals	✓	🔒	—
Manage staff	✓	✓	—
View all branches	✓	—	—
Wallet & payouts	✓	—	—
Plans & billing	✓	—	—

🔒 = only when granted by the owner, or limited to their own branch or records

- Shifts & reconciliation**
Open and close shifts, with expected versus counted cash.
- Staff commissions**
Commissions and disbursements tracked per staff member.
- Audit trail**
Every sensitive action is logged and visible to the owner.

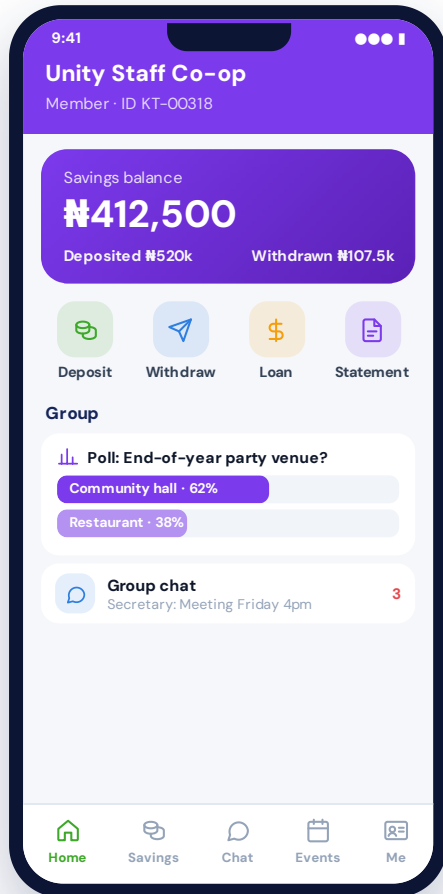

Staff dashboard

COOPERATIVES & COMMUNITY

Cooperatives, associations and their members

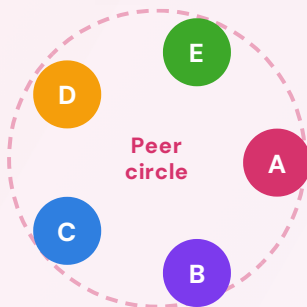

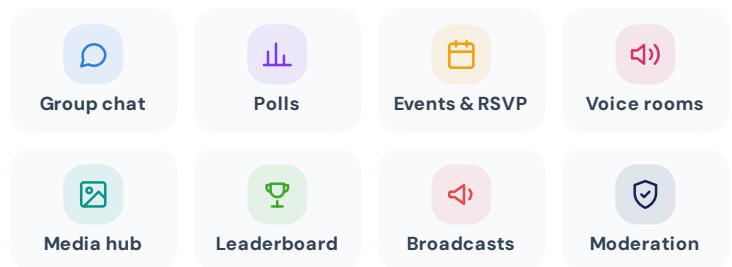

Organisations run savings programmes, loans and approvals from the Organisation Portal. Members join through their own portal and get savings statements, loan repayment, bill payments and a full community space.

**Cooperative Member Portal**

Organisation Portal

- Member management**
Onboarding with OTP, membership IDs, archive and reactivation.
- Savings programmes**
Contributions, deposit claims, bulk withdrawals and statements.
- Loans**
Disbursement, instalments and repayment records.
- Officer roles**
Verifiable approvals and delegated governance.

Community space

Peer Esusu circles

Friends, colleagues and family can start their own savings circle without a collector. Members choose daily, weekly, monthly or custom contributions; the platform keeps the ledger, runs the payout cycles and pays each winner into their wallet.

Daily **Weekly** **Monthly** **Custom** **Wallet payouts** **Ledger per circle**

MARKETER PORTAL

A field sales force that is paid on results

Marketers onboard businesses in markets and plazas. Every referral is attributed automatically, commission is calculated when the business pays, and payouts, milestones and notifications are managed in the Marketer Portal.

Referral journey

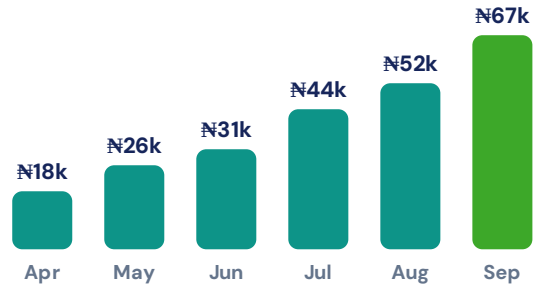

Marketer shares referral link / QR

Business registers

Business subscribes

Business renews / upgrades

Example: a marketer's monthly earnings

Commission schedule (configurable by admin)

5%

on registration

10%

on subscription

10%

on renewal & upgrade

Bonus

milestone rewards

Marketer profile

Full profile, OTP login and first-login onboarding.

Attribution

Referral links and business claims tie each sign-up to a marketer.

Payouts

Pending → approved → paid, straight to the marketer's bank.

Milestones

Bonus targets that unlock as a marketer grows.

Notifications

Alerts for new sign-ups, commissions and payouts.

Secure tokens

Signed sessions with a token deny-list on sign-out.

ADMIN PORTAL

Mission control for the whole platform

The admin team runs KudiTrack from a secure web console: users, organisations, money, plans, campaigns, communications and security, with every action approved, logged and auditable.

**Live overview**

Businesses, subscribers, wallet volume and tickets in real time.

**Approval queue**

Withdrawals, subscriptions, verifications and archives in one queue.

**Impersonation log**

Support can view as a user; every session is recorded.

ADMIN PORTAL

Everything an operator needs

Eight control areas cover the whole business. Pricing, limits, fees and features live in the database, so the admin team can change them the same day without releasing a new app.

People & accounts

- Users & businesses
- Staff, managers, collectors
- Ajo clients & org members
- Suspend · activate · delete
- BRM / CRM notes

Money & finance

- Wallet ledger & reconciliation
- Transaction notes
- Marketer payouts
- Bill provider balances
- Grants & deductions

Plans & pricing

- Edit Kobo · Naira · Oga live
- Feature keys & limits
- Coupons & promotions
- Subscription approvals
- Commission config

Campaigns & ads

- Home banners & popups
- Feed cards & tab cards
- Announcement bar
- Partner offers
- Page targeting

Communications

- Broadcast station
- Email centre & delivery log
- SMS & WhatsApp
- Push notifications
- Welcome email queue

Support & tasks

- Support tickets
- Awaiting-response tracking
- Internal tasks & comments
- Admin notifications by role
- Help centre content

Platform config

- Wallet limits & fees
- Feature flags
- Bill gate controls
- Legal documents & consent
- Cron & pipeline health

Security

- Admin roles & users
- TOTP 2FA & backup codes
- Trusted devices & sessions
- Login attempts & geo
- Full audit log

AI & LANGUAGES

Talk your money

AI is built into every part of KudiTrack. Traders can speak instead of type, ask questions in plain language, and get insights and a daily voice brief, in the language they are most comfortable with.

AI chat assistant

Voice transactions

Speech-to-text turns a spoken sentence into a sale, expense or stock entry.

AI business insights

Warnings, opportunities and recommended actions from your own data.

AI chatbot

Answers questions about sales, debts, stock and savings.

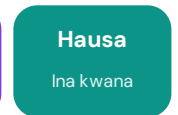

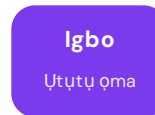

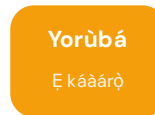

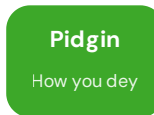

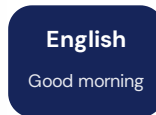

Daily voice brief

Text-to-speech reads out yesterday's results and today's to-dos.

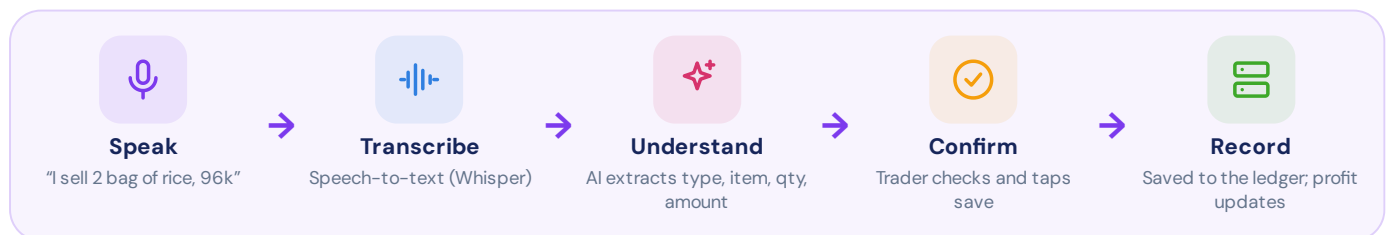

Predictions

Stock-out and cash-flow predictions from recent trends.

How voice entry works

Smart notifications

Daily profit now You made ₦48,250 profit today. Well done! 🎉	Low stock now Indomie (carton) is running low: 4 left.
Credit due now Chidi's ₦25,000 is due today. Send a reminder?	Milestone now You just passed ₦1,000,000 in sales this month!

SUBSCRIPTION PLANS

Free to start, priced to grow

Three plans, all editable live from the admin portal. Subscriptions can be paid by card or bank through Paystack, or straight from the in-app wallet.

TRUST & SECURITY

Built to be trusted with people's money

Security is layered from the phone to the database. Money can only be moved by server-side functions that check balances, limits, PINs and approvals, and every movement is reconciled daily.

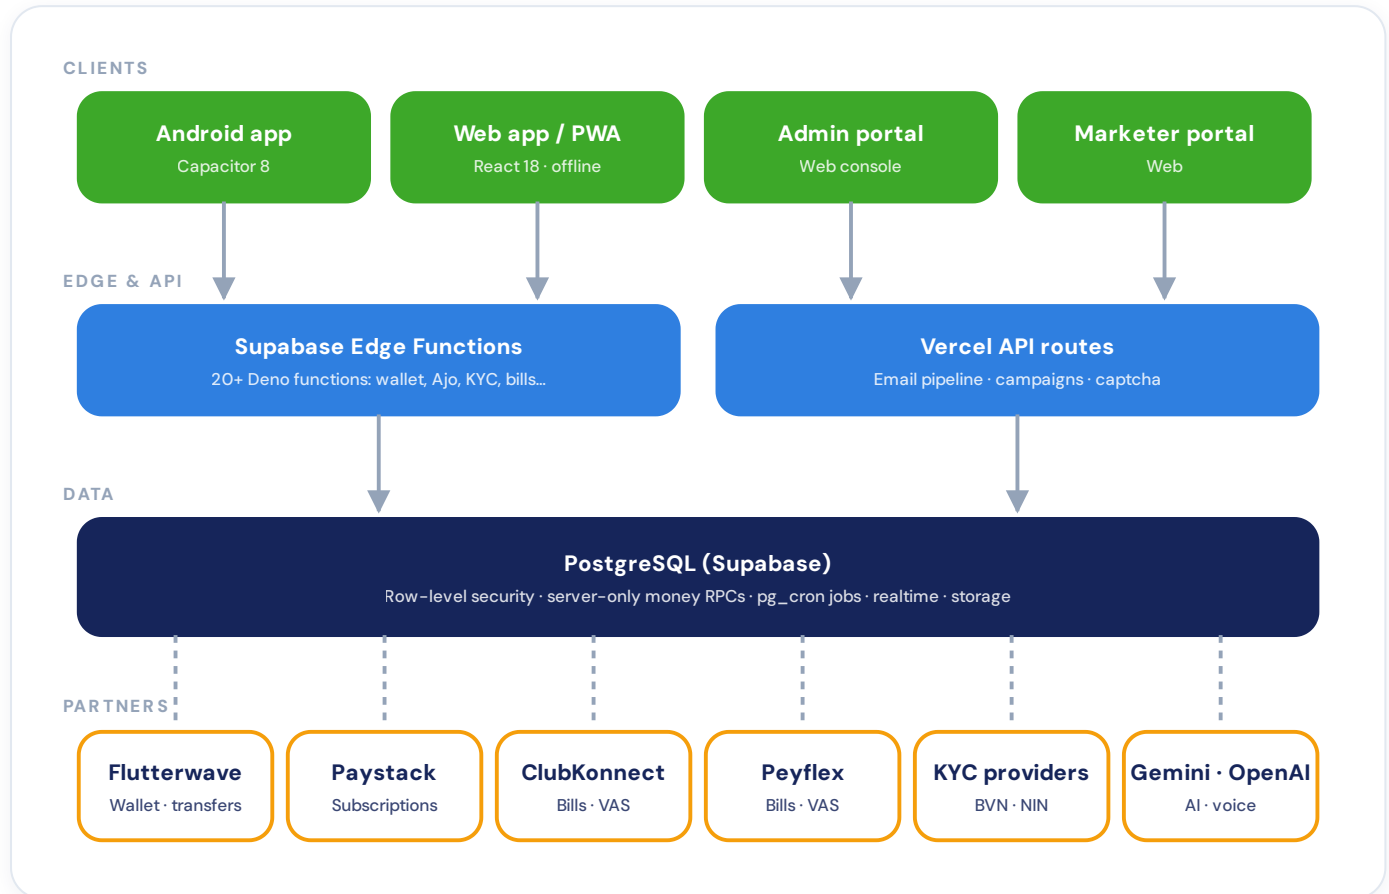

Every naira passes six checks

TECHNOLOGY

A modern, serverless stack

KudiTrack runs on a serverless architecture that is cheap to operate, scales with demand and can be updated over the air without waiting for app-store review.

Offline first

Records are saved on the phone and synced when data returns.

Over-the-air updates

Fixes and features reach users in minutes.

Omnichannel alerts

Push (FCM, Web Push), email, SMS and WhatsApp.

Config, not code

Plans, fees and limits change without a release.

Tested money logic

Unit tests on fees, tiers, periods and payouts.

Scheduled jobs

Reminders, reconciliation, low-stock and daily summaries.

20+

Supabase edge functions

400+

versioned database migrations

30+

automated test files (fees, tiers, payouts...)

FEATURE INDEX
